

CLAIMTRACE: SPECIAL INVESTIGATIONS UNIT

OFFICIAL RISK ASSESSMENT BRIEF

Claim ID: CLM-9053
Date Generated: 03/07/2026

RISK ASSESSMENT

Overall Risk Level: CRITICAL (98/100)

EXECUTIVE SUMMARY

The new claim (CLM-9053) exhibits a critical risk of fraud. It involves a triumvirate of entities—Attorney Kaplan & Associates, Summit Rehab Clinic, and QuickFix Auto Body—all of which are recurrently linked together in numerous historical claims explicitly marked as fraudulent. The injury narrative, detailing 'severe whiplash and lower back pain' requiring '6 weeks physical therapy' from a rear-end collision, is highly consistent with the vague yet costly soft tissue injury claims and treatment duration patterns identified in these prior fraud cases. The combination of identical, highly suspicious entities and a matching narrative pattern warrants immediate escalation to the fraud unit for in-depth investigation.

ENTITY ALERTS

- Attorney 'Kaplan & Associates' is linked to all 15 historical claims flagged as fraud in the provided database.
- Medical Provider 'Summit Rehab Clinic' and Repair Shop 'QuickFix Auto Body' are a common pairing with 'Kaplan & Associates', appearing together in 10 historical claims all explicitly marked as fraud.

HISTORICAL PATTERN MATCHES

- The new claim's entity network (Kaplan & Associates, Summit Rehab Clinic, QuickFix Auto Body) is an exact match for a network involved in 10 past fraud cases.
- The injury narrative 'severe whiplash and lower back pain following rear-end collision at stoplight. Requires 6 weeks physical therapy' closely mirrors patterns in historical fraud claims. Specifically, 'severe whiplash' (e.g., Historical Claim 608513) and 'flared up an old back injury' requiring 'intensive rehabilitation program' or extended therapy (e.g., Historical Claims 644081, 227811), often stemming from seemingly minor collisions.
